

NEOVAL OIL RUSTGUARD

Corrosion protection

Item no. 826 010 Canister 10 I

Item no. 826 010 Item no. 826 025

PRODUCT DESCRIPTION:

Neoval Rustguard contains high-quality additives that leave behind a dry, waxy protective film on metal surfaces following the quick evaporation of the carrier medium. This film infiltrates water and does not bond any dust. It does not form a surface on steel or nonferrous metals.

BENEFITS:

- non-emulsifying
- forms a thin protective layer resistant to hand perspiration
- · does not attack paint or machine paint
- when used as an immersion bath, it allows the added water
- to sink to the bottom from where it can be drained away separately if necessary.
- Non-resinous protective film
- non-drip
