

ALU-ZINK

high-quality cold galvanisation

PRODUCT DESCRIPTION:

Alu-Zink is a liquid cold galvanisation product that provides optimum protection against corrosion.

APPLICATION AREA:

For exhaust systems, heat exchangers, oil coolers and other parts exposed to thermal loads. Also used for post-treatment of hot-dip galvanised materials and as primer when repairing all small parts on the bodywork of cars. Alu-Zink is only suitable for metal surfaces completely degreased and polished bare. Alu-Zink darkens and cannot be recoated.

Shake can well before use.

Spray distance approx. 20-30 cm. After use hold can upside down and spray until drained.

BENEFITS:

- quick drying
- can be welded over
- Continuous temperature 350°C
- smooth, pore-free film
- dust-dry in 5-7 minutes
